

CP81 - WATER – RURAL 1(c)

That private people who require connection to the water reticulation system be offered a 3 year payment period for headworks charges in accordance with Council's Deferred Payment Scheme.

That the council adopt the following developer contribution as policy for the provision of filtered water and unfiltered water to Rural Residential subdivision in the 1(c) zone as set out in the Management Plan.

Headworks contribution – Raw and Filtered Water

The headworks charges for both raw and unfiltered water shall be in accordance with the charges set out in the Management Plan.

Reticulation – Water Supplies

All works associated with reticulation shall be at full cost to the developer.

Water Right Transfer

Water right transfer is based on the annual allocation of water consumed appropriate for Rural Residential subdivision/development (currently 2.0 megalitres for allotment).

In the event of a greater need then the developer will transfer water right based on user pay for the increase.
