

Our Ref: GEN-R-SE-GEN-0426.01

April 2022

Dear Resident/Business Owner,

### **Project EnergyConnect – Construction Update**

We are writing to update you on local traffic changes in relation to EnergyConnect, Australia's largest transmission project. The project will connect electrical grids across Australia and will improve reliability of our nation's energy supply.

SecureEnergy Joint Venture (SEJV) has been contracted by Transgrid to deliver part of EnergyConnect with the construction of 700km of new power lines from the SA border to the regional energy hub of Wagga Wagga (refer Image 1).

Commencing mid-to late April, SEJV will undertake some minor road works to provide all weather access to water fill points which supply potable water to support our construction works and the establishment and operation of a camp and laydown area adjacent to the Buronga Substation (refer Image 2). The construction of these works will enable water tankers to fill up at Arumpo Road, Buronga and Alcheringa Drive, Go! Go! (refer Image 3). We expect these works will be completed by late May to early June 2022, weather permitting.

We ask for your patience during this time as your trip may take a little longer than usual. Traffic control measures will be in place on these roads to provide for your safety.

Working hours will be 6:00am until 6:00pm, Monday through Saturday.

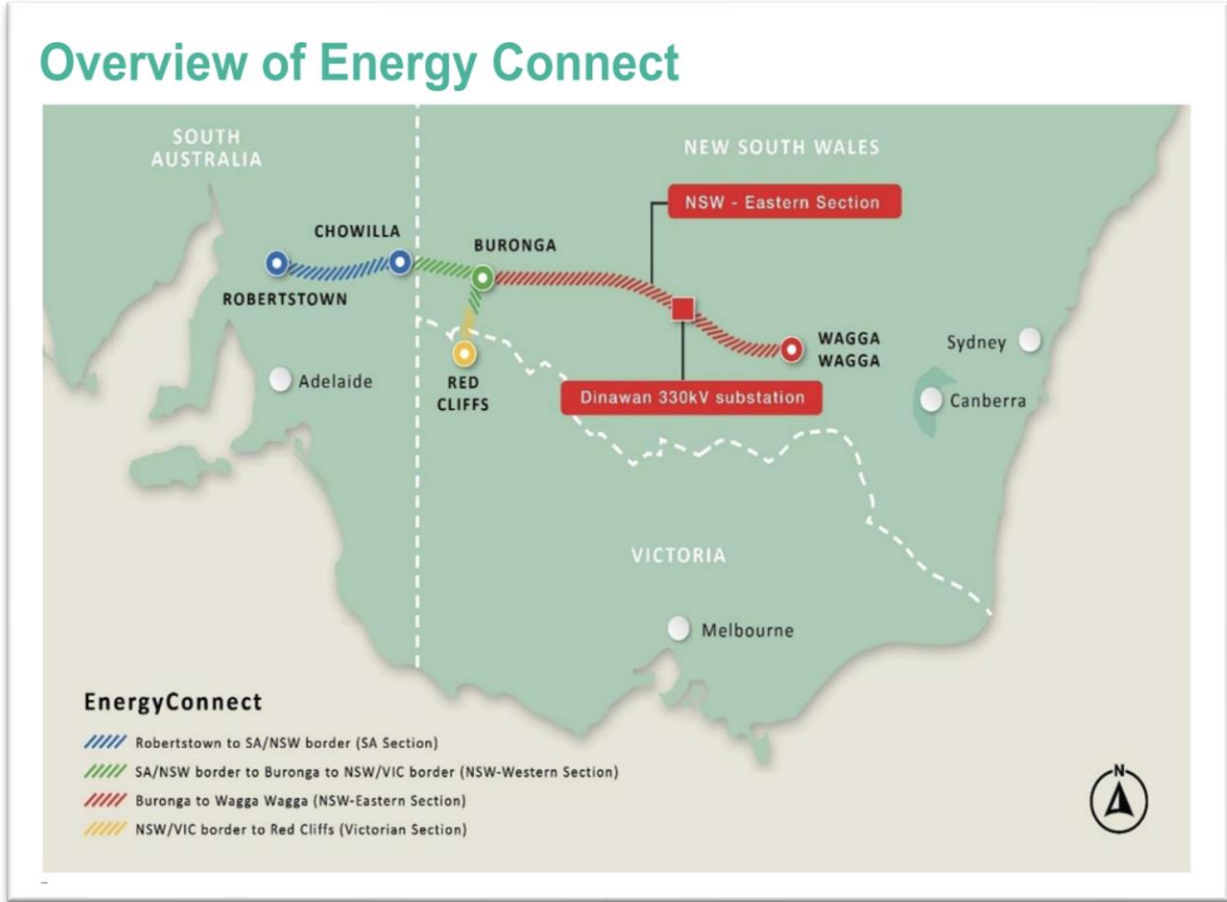

To reduce the impact for residents and motorists, SEJV will provide continuous dust suppression during the construction activities in line with our environmental approvals. We thank you for your consideration in advance.

Please feel free to contact us by phone 1800 49 06 66 or email [community@secureenergyjv.com.au](mailto:community@secureenergyjv.com.au) or logon to [www.transgrid.com.au/energyconnect](http://www.transgrid.com.au/energyconnect) for further information about the project:

Yours sincerely,

DAVID WHATMOUGH  
Project Director
