

Our Ref: GEN-R-SE-GEN-0426.01

April 2022

Dear Resident/Business Owner,

Project EnergyConnect – Construction Update

We are writing to update you on local traffic changes in relation to EnergyConnect, Australia's largest transmission project. The project will connect electrical grids across Australia and will improve reliability of our nation's energy supply. SecureEnergy Joint Venture has been contracted by Transgrid to deliver part of EnergyConnect with the construction of 700km of new power lines from the SA border to the regional energy hub of Wagga Wagga (refer Image 1). The project is due to be completed by 2024.

Commencing mid-to late April 2022, SecureEnergy will undertake some minor road works to provide all weather access to water fill points to supply potable water to support our construction works and the establishment and operation of a camp and laydown area adjacent to the Buronga Substation (refer Image 2). The construction of these works will enable water tankers to fill up at Alcheringa Drive, Gol Gol (refer Image 3) and deliver to the Buronga Camp and laydown facilities, adjacent to the substation. We expect these works will be completed by late May to early June 2022, weather permitting.

We ask for your patience during this time as your trip may take a little longer than usual. Traffic control measures will be in place at Arumpo Road and Alcheringa Drive to provide for your safety. Working hours will be 6:00am until 6:00pm, Monday through Saturday. To reduce the impact for residents and motorists, SecureEnergy will provide continuous dust suppression during the construction activities in accordance with our environmental approvals.

Additionally, your property is located on or near a road that may be affected by construction activity or water supply access routes. These include:

- Alcheringa Drive, Gol Gol (water fill point)
- Corbett Avenue, Buronga (water supply route)
- Modica Crescent, Buronga (potable water fill point)
- Fletchers Lake Road, Buronga (water fill point)
- Oxley Road, Pomona (water fill point)
- Beverley Street, Wentworth (potable water fill point)
- Sandwych Street, Wentworth (water supply route)
- Arumpo Road, Buronga (road access point)

Residents can expect increased vehicle movements on these roads and are advised to stay under the speed limit and drive to the conditions, such as slowing down in wet weather and poor visibility.

We thank you for your patience and understanding during these construction activities. Please feel free to contact us by phone 1800 49 06 66 or email community@secureenergyjv.com.au or logon to www.transgrid.com.au/energyconnect for further information about the project.

Yours sincerely,

DAVID WHATMOUGH
Project Director
