

Wentworth, Dareton, Gol Gol and Buronga flooding Stay informed Advice

Issued: Sunday 06 Nov 2022 4:21 pm

Next update: Monday 07 Nov 4:00 pm or as the situation changes

The NSW SES advises people in the following area(s) to **STAY INFORMED** about predicted widespread major flooding on the Murray River:

- Wentworth
- Dareton
- Buronga

You should stay informed by monitoring warnings issued by NSW SES on their website and Facebook page, listening to your local ABC radio station, and checking the latest weather information from the Bureau of Meteorology online.

What are we expecting?

The Bureau of Meteorology advises rainfall over the past several days and weeks has caused renewed and prolonged flooding along the Murray and Edwards Rivers and their tributaries.

Significant breakout flows from Torrumbarry have spilled into the Wakool River. These flows, combined with flows from the Murray and Edward Rivers are likely to cause major flooding at Wakool Junction from Sunday evening. These flood waters may cause major flooding downstream at Mildura and Wentworth with levels higher than the 1975 flood event.

Forecasts will be progressively refined once the upstream flood peaks along the Murray River and its tributaries are observed.

MILDURA WEIR

The Murray River at Mildura Weir is likely to exceed the minor flood level (36.00 metres AHD) around Monday. The river is currently 35.85 metres and rising.

The river level may exceed the moderate flood level (37.50 metres AHD) around 21-25 November and may reach the major flood level (38.50 metres AHD) around end of November.

Further rises are possible.

WENTWORTH

The Murray River at Wentworth is likely to exceed the moderate flood level (32.68 metres) around Monday. The river is currently 32.63 metres and rising.

The river level may reach the major flood level (33.88 metres) around the first week of December.

The NSW SES will be conducting drop-in sessions regarding the imminent flooding for Buronga and Wentworth next Sunday in both communities.

The Wentworth Drop-In session will take place next Sunday, 13 November between 9am and 11am. The venue is yet to be confirmed.

The Buronga Drop-In session will take place between 2pm and 4pm next Sunday, 13 November

and again, the venue is yet to be confirmed.

These sessions are designed to provide information about the upcoming flooding and the NSW SES will be there to answer any questions the community may have about the flood response.

Based on predictions from the Bureau of Meteorology, the following areas may be impacted by dangerous floodwaters:

- Log Bridge Road 750m west of Lagoon Road
- Low lying areas in Junction Park
- Low lying areas of Willow Bend Caravan Park
- Ski Reserve boat ramp
- Ski Reserve Road near the Broken Hill / Wentworth Pumping Station
- Low lying areas along the Darling and Murray Rivers may be inundated
- Local access roads may be closed due to floodwater
- Low lying sporting fields, parklands and public recreation areas are impacted by floodwater

What you need to do:

- If you have a Home and/or Business Emergency Plan, review it now. Otherwise, have a conversation and plan for what you will do and take with you if you need to evacuate.
- Consider the consequences of road and bridge closures and water over roads and make alternate arrangements for work, children, and travel.
- Obey all signs about road closures and instructions from emergency services.
- Never drive, walk, ride through, play or swim in flood water - it is dangerous, toxic, and may void your car insurance. If it's flooded, forget it. Fines may apply.
- Avoid storm drains and pipes, ditches, ravines, creeks, and rivers.
- People in areas likely to be impacted by flooding should raise their assets, including waste and chemical containers above expected flood heights.
- Share this information with family, friends, and neighbours and help others prepare where possible.
- If you are likely to be isolated due to flooding, stock up on essential items now.
- Visit Wentworth Shire Council website for information on local road closures <https://www.wentworth.nsw.gov.au/infrastructure/engineering-services/roads-and-traffic/road-condition-report/>
- Farmers should consider moving pumps and farm equipment to higher ground.
- Companion animals and livestock should be relocated to higher ground that will not become an island.
- Never drive, walk, ride through, play or swim in flood water - it is dangerous, toxic, and may void your car insurance. If it's flooded, forget it. Fines may apply.
