

Wentworth flooding Do not enter floodwater Watch and Act

Issued: Wednesday 09 Nov 2022 5:31 pm

Next update: Thursday 10 Nov 4:30 pm or as the situation changes

The NSW SES advises people in the following area(s) **NOT TO ENTER FLOODWATER** due to predicted widespread major flooding:

- Wentworth and surrounding areas

You should monitor the situation as it is constantly changing. Avoid floodwater for your safety.

What are we expecting?

The Bureau of Meteorology advises rainfall over the past several weeks has caused renewed and prolonged flooding along the Murray and Edwards Rivers and their tributaries.

Significant breakout flows from Torrumbarry have spilled into the Wakool River. These flows, combined with floodwaters from the Murray and Edward Rivers, have caused major flooding at Wakool Junction and may cause major flooding downstream at Boundary Bend, Euston, Mildura and Wentworth, with levels higher than the 1975 flood event.

Moderate flooding is currently occurring at Boundary Bend and Wentworth.

VITAL COMMUNITY INFORMATION

- Current mapping products for the Murray River from Victorian authorities are not portraying an accurate picture on Murray River flooding on the NSW side of the river.
- These maps have been designed to highlight Victorian communities only and the impact of newly created levies in Wentworth are not accurate.
- Please do not use these online products to inform you of your flood-risk during this current event.
- The Bureau of Meteorology provide daily updates on predicted flooding and the NSW SES will continue to publish daily warnings about Murray River flooding and the consequences downstream of Mildura.
- Please visit www.ses.nsw.gov.au to view these warnings each day.

WHAT'S HAPPENING?

The Murray River at Wentworth may exceed the major flood level (33.88 metres AHD) and reach 34.30 metres AHD around the first week of December, with major flooding.

The river is currently 32.75 metres and rising.

DROP IN FLOOD INFORMATION SESSIONS THIS SUNDAY

The NSW SES will be attending a drop-in session regarding the imminent flooding for Wentworth Sunday 13 November.

The Wentworth Drop-In session will take place Sunday, 13 November between 9am and 11am at Wentworth Town Hall, Corner Adelaide & Short Street, Wentworth.

The session is designed to provide information about the upcoming flooding and the NSW SES will be there to answer any questions the community may have about the flood response.

Based on predictions from the Bureau of Meteorology, the following areas may be impacted by dangerous floodwaters:

- Log Bridge Road 750m west of Lagoon Road
- Low lying areas in Junction Park
- Low lying areas of Willow Bend Caravan Park
- Ski Reserve boat ramp
- Ski Reserve Road near the Broken Hill / Wentworth Pumping Station
- Low lying areas along the Darling and Murray Rivers may be inundated
- Local access roads may be closed due to floodwater
- Low lying sporting fields, parklands and public recreation areas are impacted by floodwater

What you need to do:

- If you have a Home and/or Business Emergency Plan, review it now. Otherwise, have a conversation and plan for what you will do and take with you if you need to evacuate.
- Consider the consequences of road and bridge closures and water over roads and make alternate arrangements for work, children, and travel.
- Plan your route carefully to avoid flooded roads and allow extra travel time.
- Obey all signs about road closures and instructions from emergency services.
- Avoid storm drains and pipes, ditches, ravines and rivers.
- Never drive, walk, ride through, play or swim in floodwater - it is dangerous, toxic, and may void your car insurance. If it's flooded, forget it. Fines apply.
- Share this information with family, friends, and neighbours and help others prepare where possible.
- Visit Wentworth Shire Council website for information on local road closures <https://www.wentworth.nsw.gov.au/infrastructure/engineering-services/roads-and-traffic/road-condition-report/>

For more information:

- Listen to your local ABC radio station which can be found at reception.abc.net.au.
