To whom it may concern,

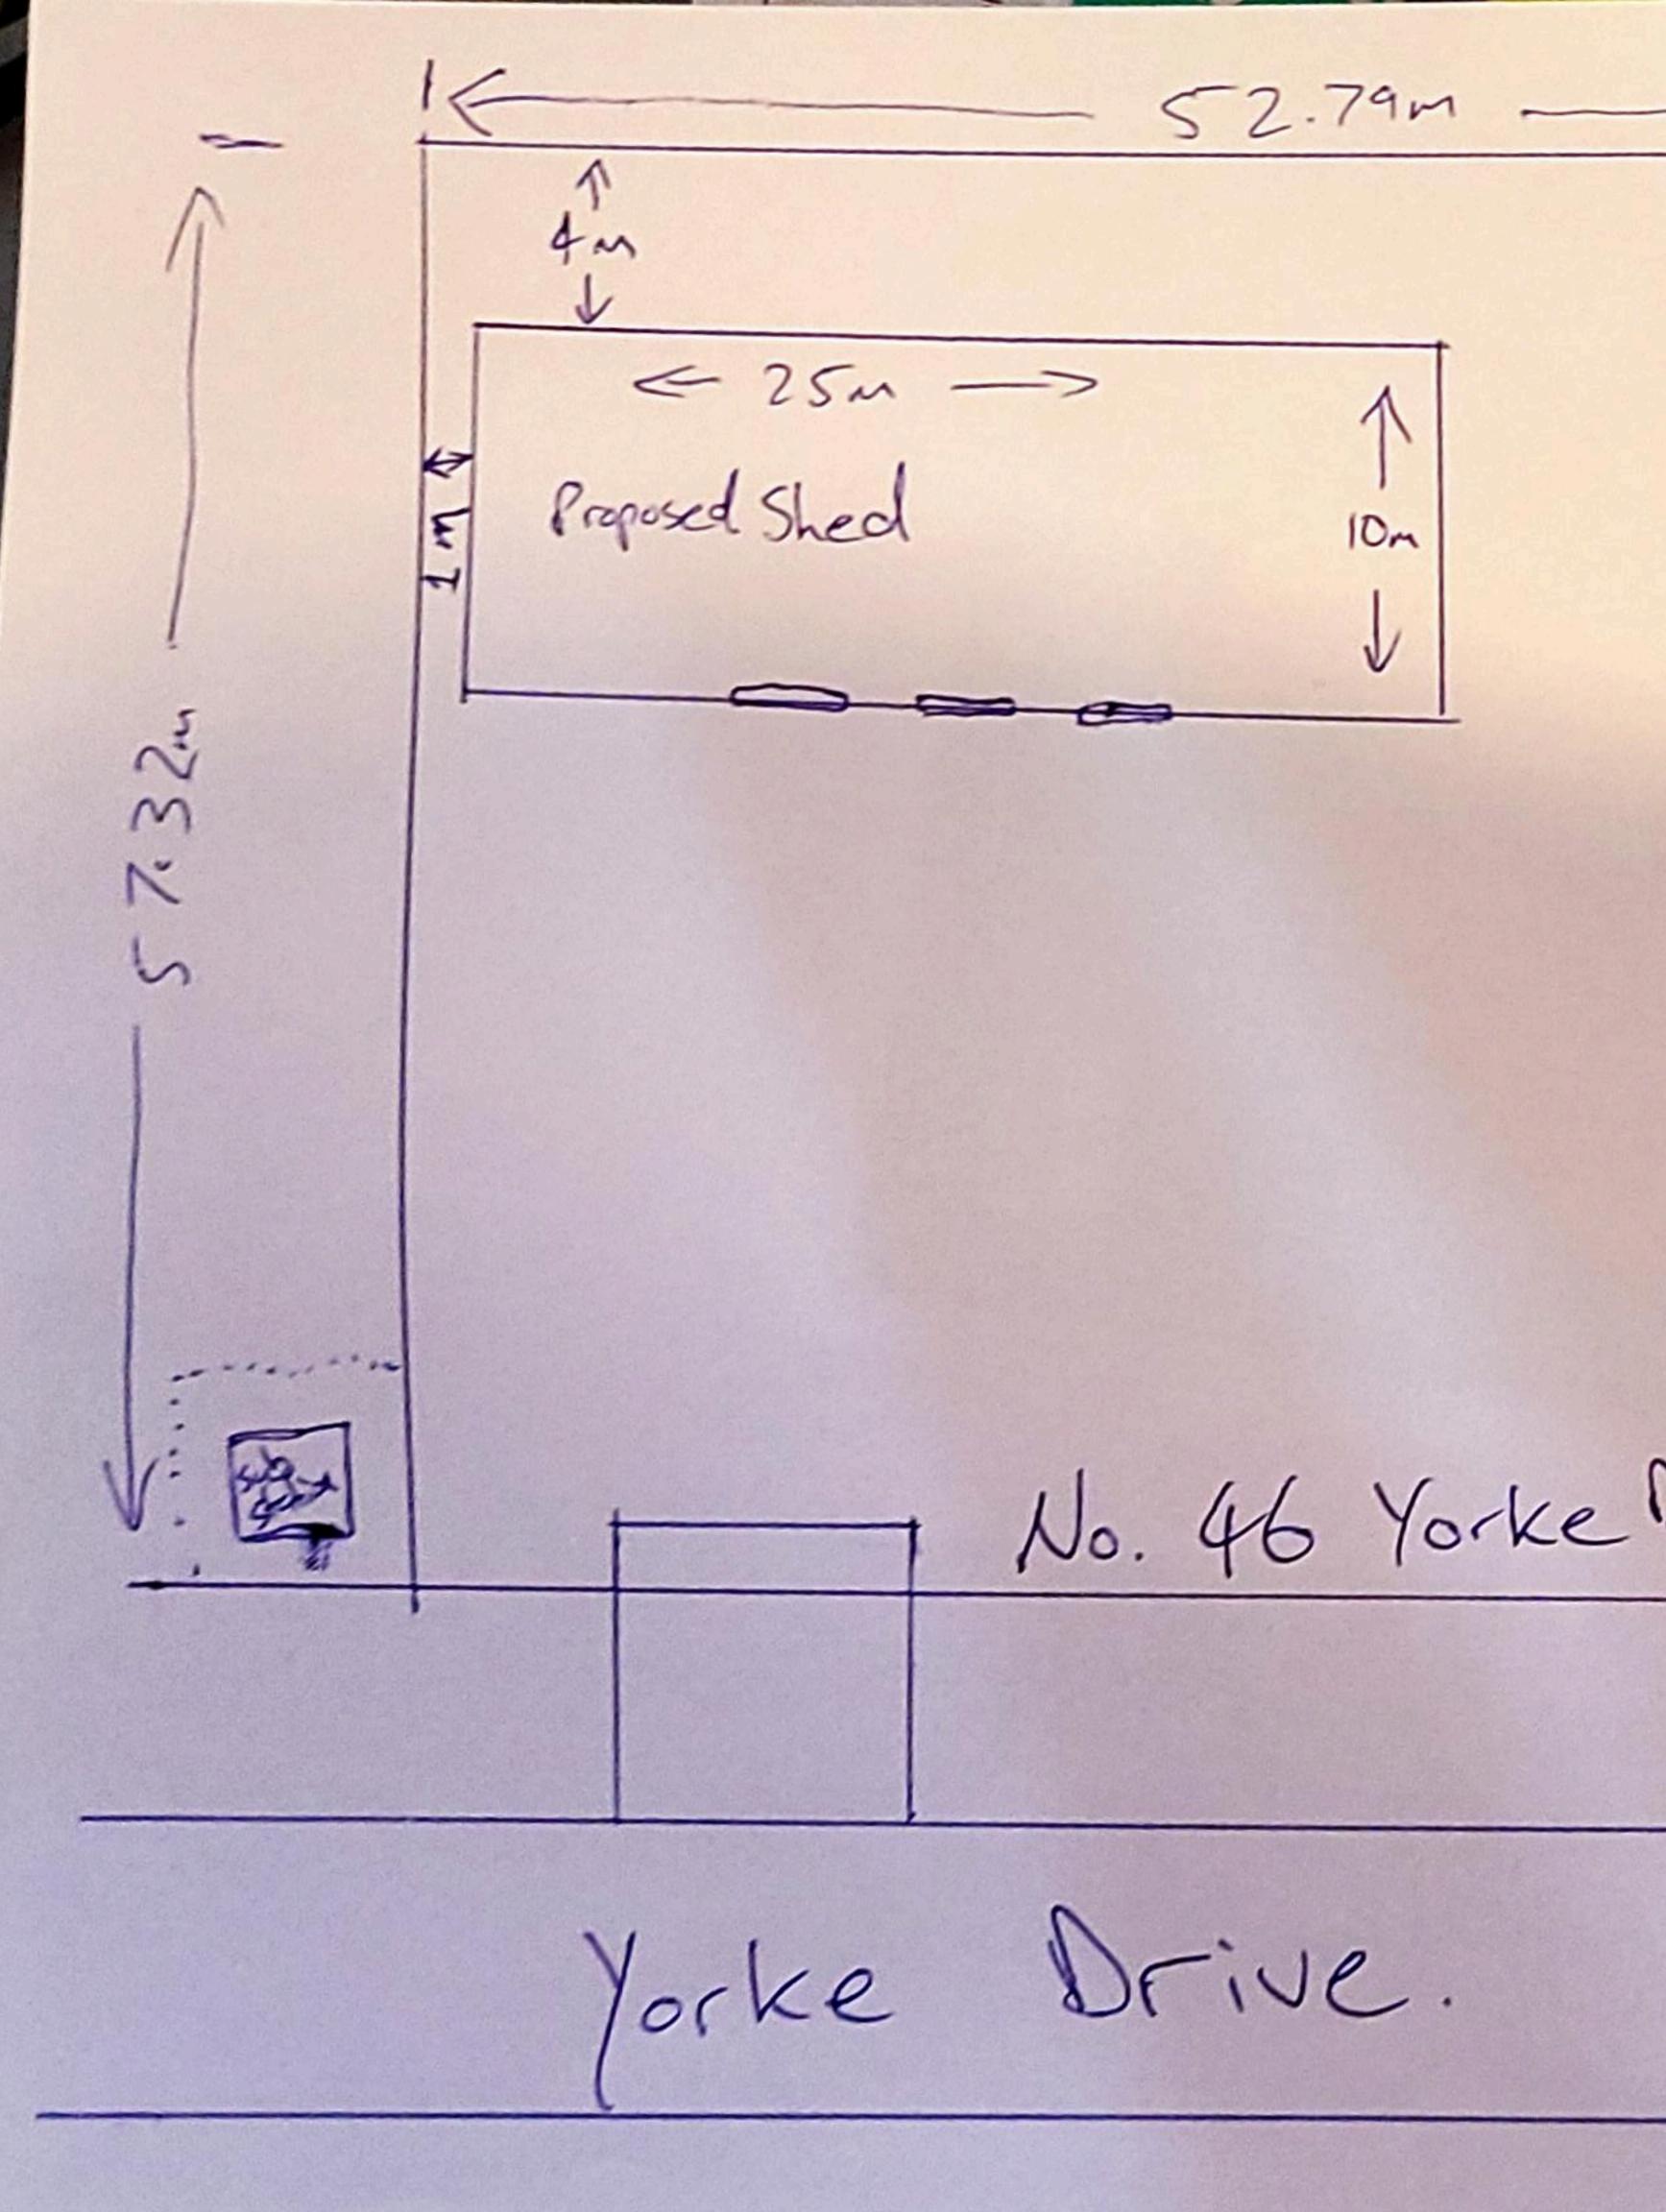

I require to amend the DA2023/025 to downsize the shed from a 24mx15m to a 25mx10m shed as I do not require it to be so large. And the less I spend on the shed more can be spent on the house build.

I did not put in the original DA2023/025, this was already done before we purchased the land last year and I have also changed the location of roller doors and personal access doors to better suit my required needs.

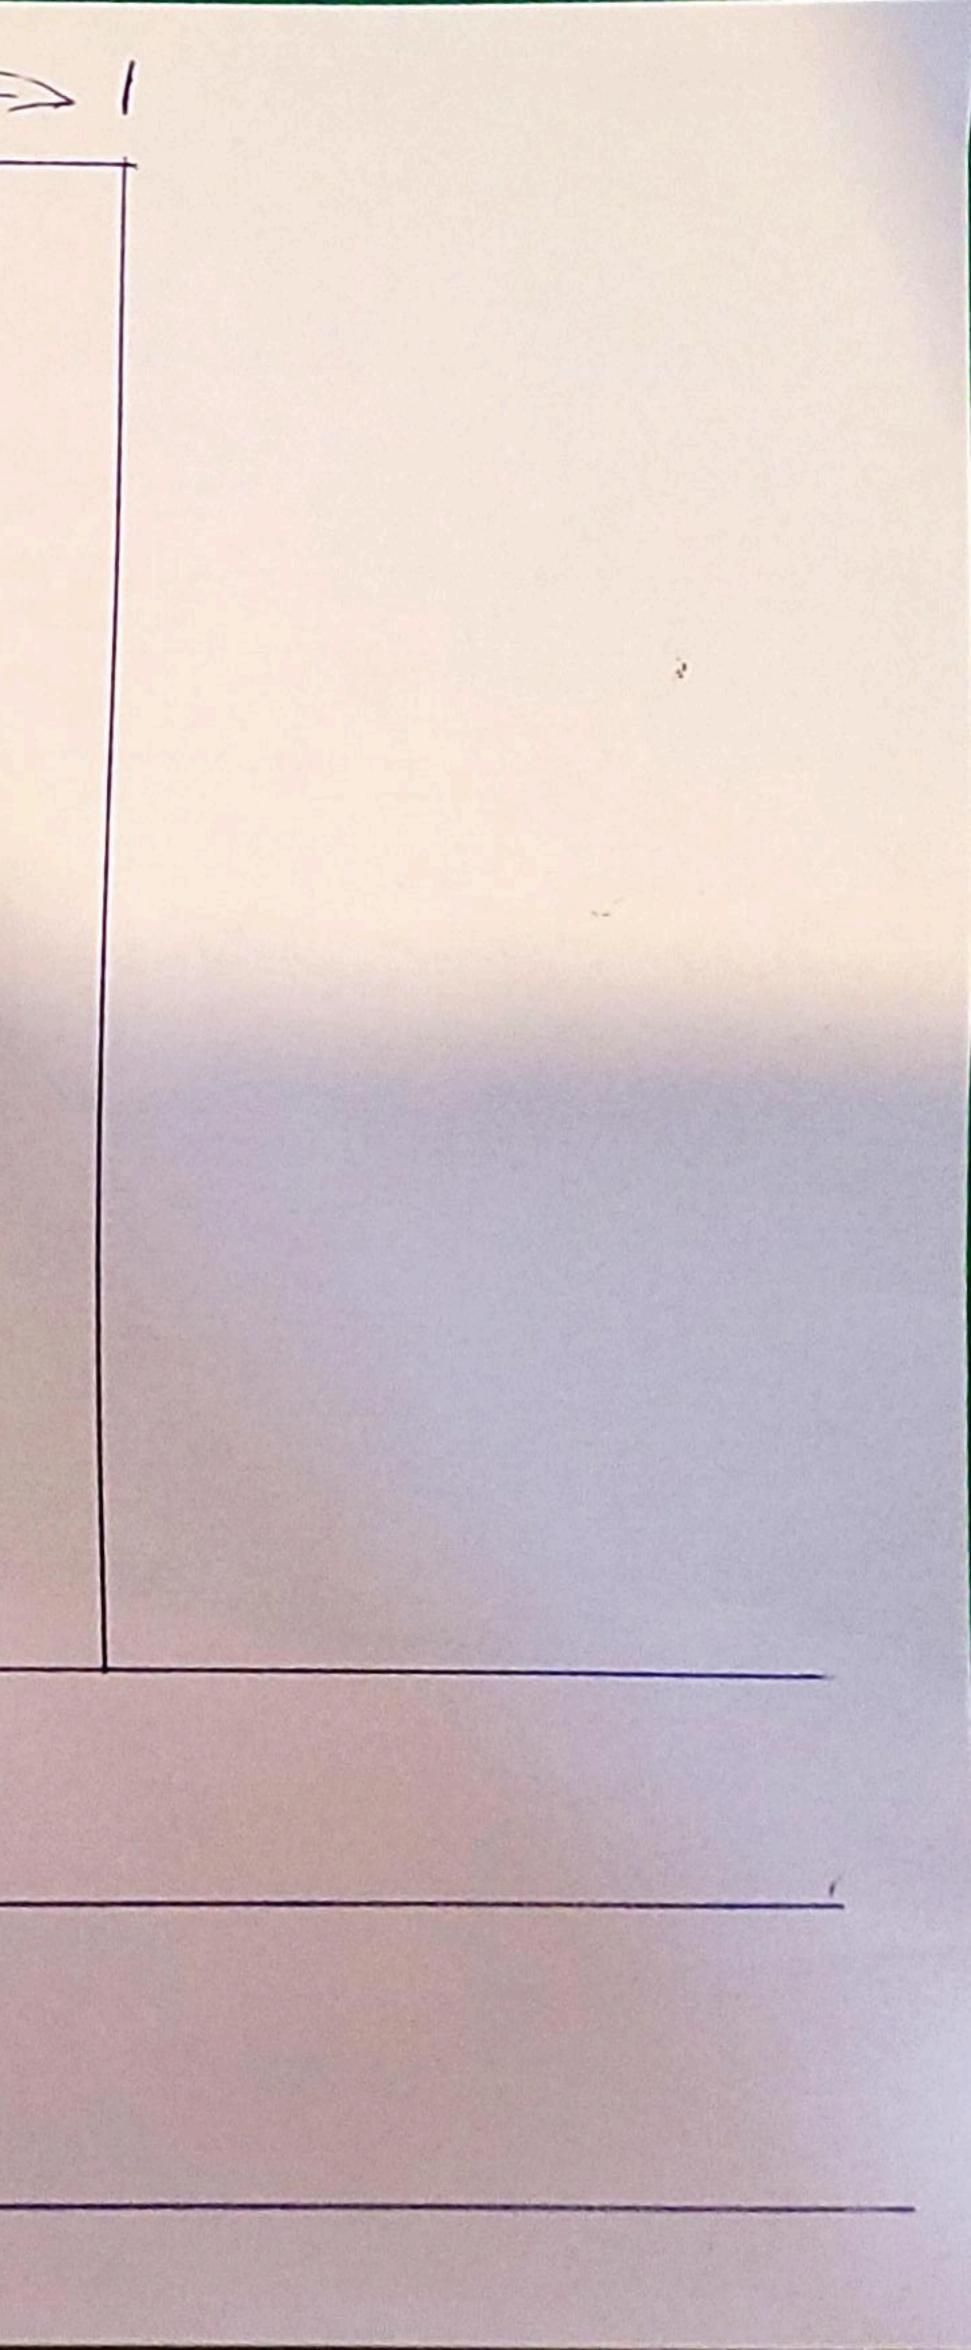

I also wish to add the Wet area as per plan to have a shower, toilet and basin to be plumbed in when the house and septic are installed.

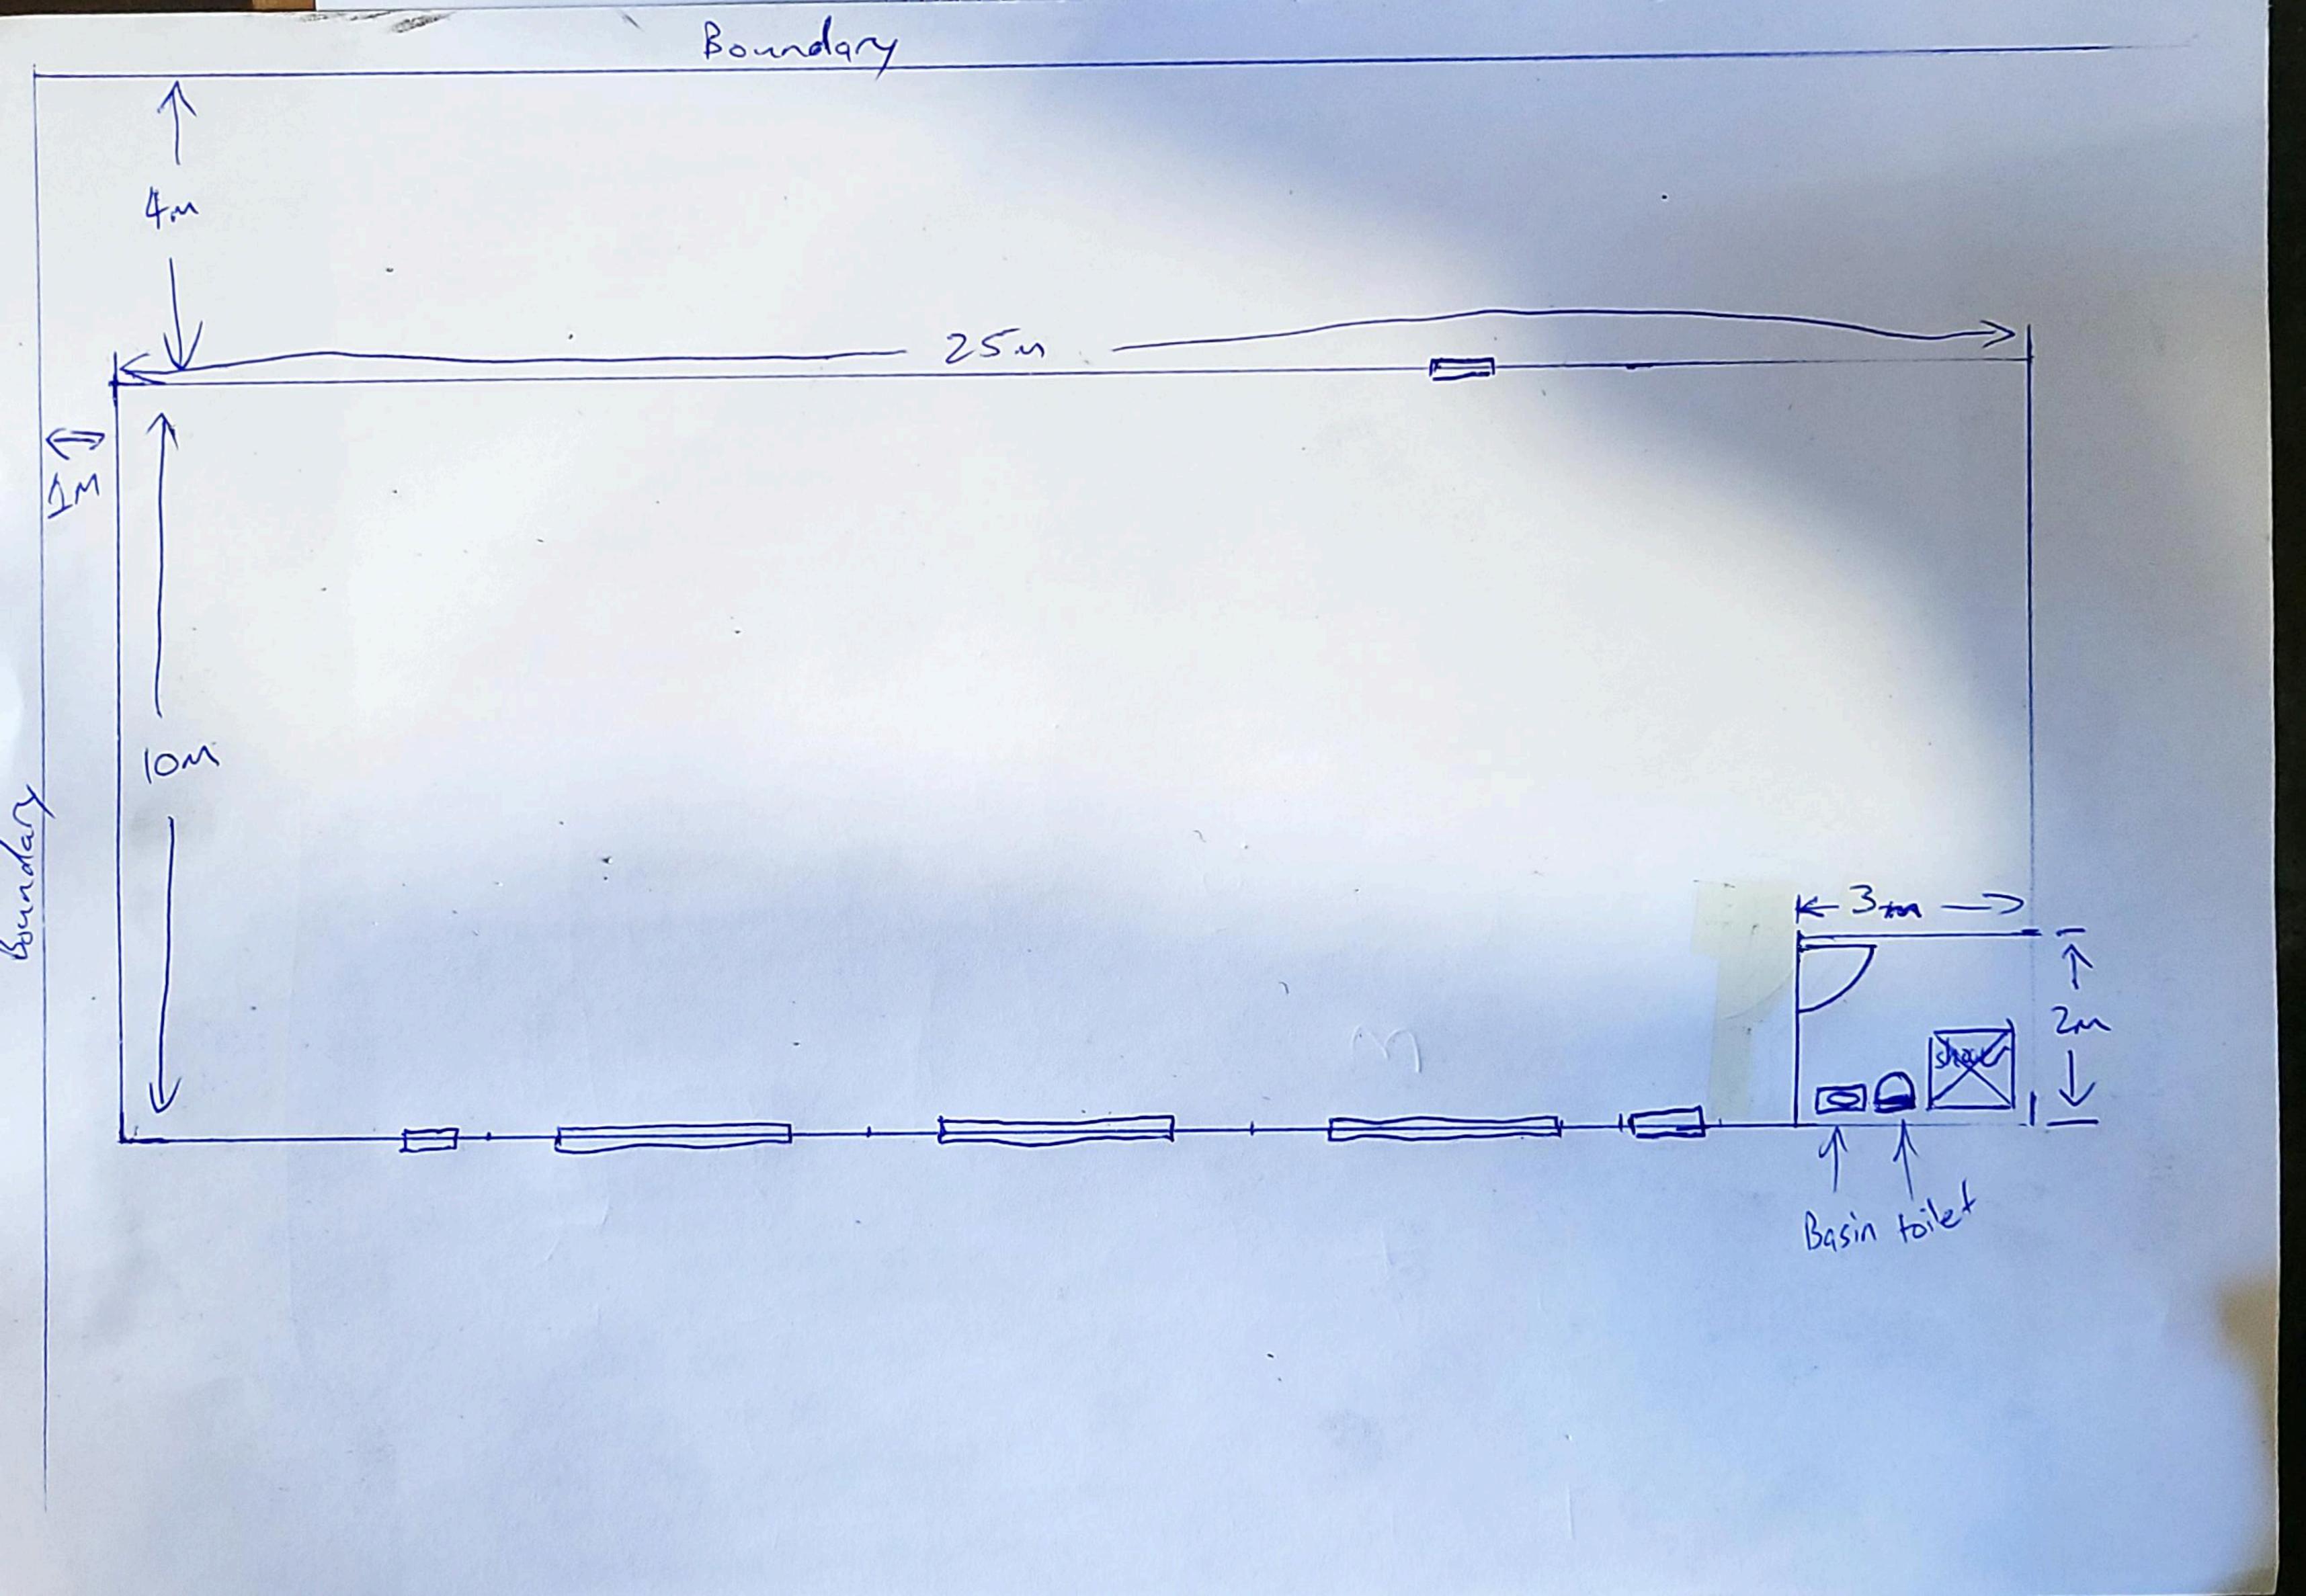

Regards,

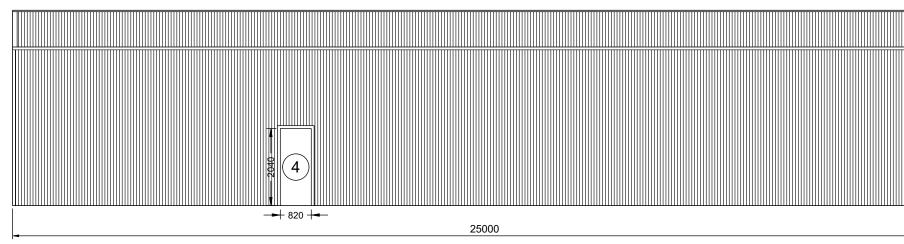

Damon Watson.
