

Elecnor Australia has been contracted by Transgrid to deliver part of EnergyConnect with the construction of 700km of new power lines from the SA border to the regional energy hub of Wagga Wagga. The project will connect the electrical grids of New South Wales, South Australia, and Victoria, improving reliability of our nation's energy supply.

Construction activities

The EnergyConnect project team are continuing to close out construction activities on the transmission line from Buronga, NSW to the South Australian border as well as Buronga to Red Cliffs, Victoria.

Aerial surveying and photography

As part of our quality assurance activities, we will be carrying out an aerial survey and high-resolution photography on the Western section of EnergyConnect between **Wednesday 19 November to Sunday 23 November 2025, weather permitting.**

This work will be carried out by our delivery partner Raedyne Systems who will be operating out of Mildura, Wentworth and Renmark airports with a helicopter, pilot and support crew.

Works outside of approved construction hours

The approved hours of work are:

- 7am to 6pm Monday to Friday
- 8am to 1pm Saturdays
- At no time on Sundays and NSW Public Holidays.

Planned aerial surveying activities are part of approved out of hours construction work and will occur between 6.00am to 6.30pm (including travel times).

This is to ensure these activities are carried out safely and to minimise disruption to the community.

How could this impact you?

You may see and hear helicopters flying along the transmission line alignment between the South Australian border, Buronga and Red Cliffs, and transiting between airport landing sites.

Any increase in noise levels will be temporary while the helicopter carries out the transmission line aerial survey work.

How we're managing Impacts

Aerial surveying works will be performed in accordance with ENA NENS 08 – 2006: *National Guidelines For Aerial Surveillance of Overhead Electricity Networks*.

All work will be carried out in line with the project's Conditions of Approval and Construction Environmental Plan.

Maintaining your privacy

Imagery captured during the aerial surveys will only be used to inform a condition assessment of the EnergyConnect transmission line and will not be shared with any third parties without the consent of affected landowners.

Contact Us

Please contact your dedicated land access officer should you have any questions about these upcoming works or would like to advise us of any property access matters.
